

# Little Hearts For His Glory

*A Complete Kindergarten or First Grade Program  
that takes your child on an exciting voyage through time...  
written for 5-7 year olds to explore!*

You only have to watch 5-7 year olds for a moment to see that they are ready to get moving and explore! *Little Hearts for His Glory* channels that energy and puts it to good use as children take an adventuresome trek through time, from Creation to present day. This program will have your child armed and ready to take on the exciting tasks ahead... like launching a lifelong love of reading, embarking on an action-packed journey through history, and exploring this incredible world that God made!

*Little Hearts for His Glory* features 34 dynamic units with complete plans to walk your child through the most foundational essentials of "Learning Through History" and "Learning the Basics". Teaching kindergarten or first grade could not be easier or more enjoyable, and you can rest assured that all the bases are covered with this two-prong approach to teaching!

During the "Learning Through History" part of the program, your child will gain a chronological overview of history from Creation to present day. Bible stories and history stories are integrated, so your child will see God's sovereign hand through time. History will come alive for your children as

they become the "earth" and revolve around the sun, build (and eat) golden calves out of edible playdough, play "King, May I?" with Queen Esther, pan for "gold" in California, pack eggs for a wagon train ride with the pioneers, and do many more rousing activities as they journey through time!

But that's not all! The "Learning Through History" theme helps your child make other awesome connections too! Action rhymes, simple science experiments, and dramatic play scenes all match the history theme and get your

wiggly little ones up and moving. Bible memory work, devotional discussions, and toe-tapping music help your child make creative connections with the history theme too. The Visual History Set uses beautifully illustrated picture books to enhance the history study. Forget about history being something you just read about, *Little Hearts for His Glory* will help bring it to life!

The "Learning the Basics" part of *Little Hearts for His Glory* gets kids energized and ready to take on new learning in language arts and math. This part of the program is known for its flexibility, and puts you in the driver's seat as you choose what levels

# Little Hearts For His Glory

best fit your children. As your child ventures into phonics, fine motor skills, handwriting, and new math skills, nothing could be more important than having choices about what is the best match for your child. No wonder this is a greatly appreciated part of the program!

The Storytime set of books includes a treasure trove of homeschool family favorites. For Storytime, you'll "cuddle-up-and-read" about the adventures at Pleasant Valley Farm, Bramble Hedge, Thimbleberry Lane, and more! After reading, daily questions build reading comprehension and teach story elements too. Now, what's not to love about that?

We approach language arts in a living way by using classic chapter books from Thornton Burgess and Beatrix Potter to teach skills like critical thinking, basic writing, vocabulary practice, and using contextual clues. A fun variety of follow-up activities make our "Language Arts" so much more than just worksheets!

One other thing your children will love in "Learning the Basics" is the choice of math provided in the guide. They'll count backward by making a row of snacks and saying the number left after eating one snack at a time, sing the "Hokey Pokey" to practice right and left directions, and hunt for shapes in your own kitchen cupboard to

trace. Math has never been this easy and fun!

With all of these amazing components, you must be wondering how much time all of this will take? No need to stress out about that. *Little Hearts for His Glory* is written with the hard-working homeschool teacher in mind. Easy daily plans are truly "open-and-go", and require little or no preparation ahead of time. The simple boxed format of plans allows you to do homeschool in 10 minute increments spread throughout the day, or in one 120 minute sitting all in a row.

The two-page plan for each day lets you see at a glance all that you and your child will be doing, and the convenient packages of resources ensure that you will NOT have to leave the comfort of your home to chase down library books or other learning materials.
